Face & Side-Lit Signs Diagram

The drawing below shows a face & side-lit signs with CNC engraved acrylic signs shell. Also could be made with fabricated acrylic signs shell.

If the backing wall is thin and construction can be performed on the another side of the back wall, please use nuts and washers to fix the stud bolts on the back wall, so that the signage can fix on the backing wall more secure.

The AC transformer emits heat during work. We recommend that the AC transformer be placed in a ventilated position or in a power distribution box with air vents to facilitate heat dissipation, to make the AC transformer have a better service life.
